Summary

- Patient Name: Jenifer
- Result Summary:
- No signs of diabetic retinopathy were detected in the analyzed retinal image.

- **Clinical Interpretation:**
- Your retina appears healthy, with no visible microvascular damage related to diabetes. This indicates a very low current risk of diabetic eye disease.
- **Recommendations:**
- - Continue routine annual retinal screening.
- - Maintain good blood sugar, blood pressure, and cholesterol control.
- - Seek medical attention if you notice visual symptoms such as blur, floaters, or flashes.
- **Confidence Level:** 84.32%
- **Estimated Risk:** Minimal
- VisionAI provides decision-support only and does not replace clinical examination.
