

Patient Report — VisionAI Screening Summary

Hi **Patient_328** — I'm **VisionAI**, your retinal health assistant.

Summary: Moderate to Severe diabetic retinal changes detected. Please consult ophthalmology.

Estimated risk score: N/A | Model confidence: —

What this means for you

- Keep blood sugar and blood pressure under control — these reduce risk of vision loss.
- Eat foods rich in Vitamin A, C, E, zinc, and omega-3 (fish, leafy greens, citrus, nuts).
- Avoid smoking and prolonged high-sugar snacks. Stay hydrated and manage screen time.
- If you notice blurred vision, floaters, or sudden vision change — see an eye doctor immediately.

Disclaimer: This report is an automated screening output and is not a substitute for a clinical diagnosis by an ophthalmologist.
