

## SHAP

## Lesion Quantification

### Lesion Quantification:

Feature	Percentage
Exudates	3.21%
Hemorrhages	5.34%
Cotton_wool	0.00%
Lesion_percentage	8.55%

## Clinical Recommendations

- Urgent ophthalmology referral if severe stage.
- Consider OCT imaging and HbA1c optimization.
- Optimize BP and lipid control.
- Retinal follow-up every 3–6 months based on severity.

## Model Evaluation Metrics

Accuracy: 0.947  
F1-score: 0.938  
AUC/ROC: 0.971
