

VisionAI — Patient Report

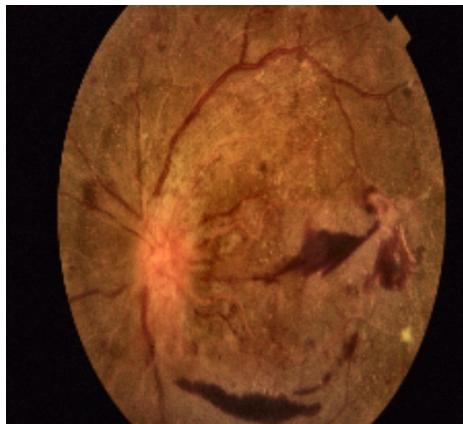

Friendly Summary

Condition: PDR

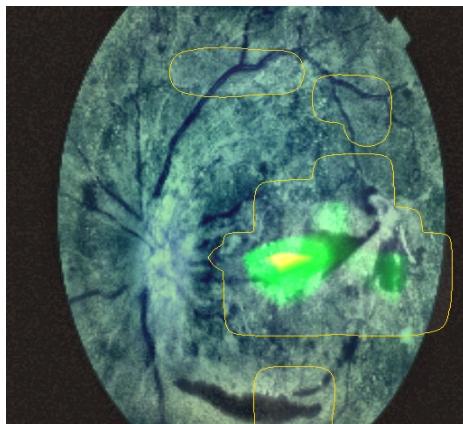

Risk Level: Critical

Confidence: 76.51%

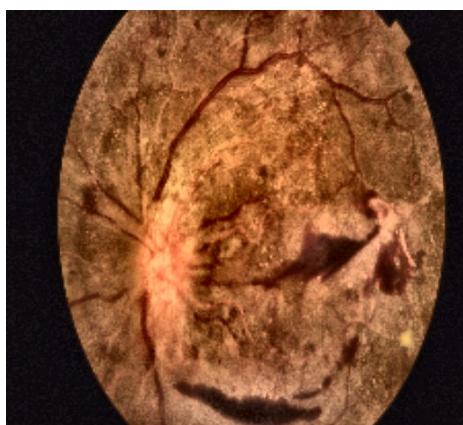

Original

Grad-CAM (AI highlights)

Preprocessed

What this means:

The AI has identified areas in your retinal image that suggest diabetic-related changes. This is a screening aid and not a diagnosis. Please follow the recommendations below.

- Consult an eye specialist as soon as possible.
- Keep blood sugar and blood pressure under control.
- Attend follow-up screening as advised by your doctor.
