

Clinical Report

Generated: 2026-01-11 16:13:38

Stage: PDR

Metadata Snapshot

Name: sebastain
Age: 89
Gender: Female
Systolic (mmHg): 180
Diastolic (mmHg): 110
BMI: 30
Glucose: 432
HbA1c: 8.9
Cholesterol: 300
Smoking: Yes
Hypertension: Yes
Diabetes Duration: 19

Summary

- Clinical Report — Ophthalmology
- Patient: sebastain
- Automated Diagnosis:

Summary

Generated: 2026-01-11 16:13:39

- Predicted Stage: Pdr
- Confidence: 85.43%
- Risk Score: 96.2%
- Findings:
 - Automated lesion quantification and explainability analyses (Grad-CAM, LIME, SHAP) support the predicted disease stage.
- Clinical Interpretation:
 - The findings are consistent with diabetic microvascular damage. Correlation with clinical examination and OCT imaging is recommended where appropriate.
- Performance Reference:
 - Accuracy: 0.947 | F1-score: 0.938 | AUC: 0.971
- VisionAI is intended for decision support and audit assistance.
