Summary

- Clinical Report — Ophthalmology
- Patient: Jenifer
- Automated Assessment:
- No diabetic retinopathy detected.

- Clinical Interpretation:

- No microaneurysms, hemorrhages, exudates, or neovascular features were identified. Explainability analysis and lesion quantification were intentionally skipped due to absence of pathological findings.

- Recommendation:

- Routine annual screening is advised unless additional clinical risk factors exist.

- Model Confidence: 84.32%
